Re: 23 October 2004 Naglee Park Tree Planting

Ms. Berry,

Campus Community Association of Naglee Park would like to extend our gratitude to Our City Forest for another successful tree planting. 72 trees were planted in just over 2 hours.

We would especially like to thank Asma Malik for successfully organizing and providing support for the event and the days leading up to the event. A well-run event means the volunteers can quickly execute their assignments and return to their normal Saturday tasks. This ensures that our volunteers will join us again for future plantings.

Thank you for making a long-term investment into the future of our community. The beauty, shade, visual integrity and arboreal continuity of the street tree plantings further promote (private) investment in our neighborhoods. And the program provides a fun way to involve our residents in volunteer service, which is healthy for our spirits and the community.

Sincerely,

David Erickson
President, Campus Community Association

cc. Asma Malik
